

AQUATHANE SUPER

Water Based Polyurethane Finish

DESCRIPTION: AQUATHANE SUPER is a one component water based polyurethane acrylate finish, formulated specifically for the treatment of hardwood and other types of wooden floors subjected to heavy wear. Aquathane Super can also be used successfully on most factory pre-finished floors providing the surface is cleaned and a suitable 'key' is created using appropriate grade of sandscreen disc or paper (trial before use).

AQUATHANE SUPER offers many advantages to the user:

- Very hard wearing finish
- Low odour
- Fast drying and rapid recoating time
- Excellent resistance to most chemicals
- Easy to apply
- Excellent gloss, silk or satin finish
- Suitable for domestic, commercial and industrial use

APPLICATION: **Ensure adequate ventilation at all times throughout procedure.** New or refurbished hardwood floors should be finished with 100grit sandpaper or finer to obtain a smooth surface. Apply one coat of Aquathane Primer where applicable. **If history of surface wax is present, please contact our Technical Department for advice.**

Previously finished floors should be thoroughly clean, dry and suitably abraded to form a good 'key'. Apply Aquathane Super with a suitable applicator and pad. The use of a seal applicator dish affords maximum control of finish during application. Recoating should not take place until first coat is dry. A suggested average recoating time is between 1 – 2 hours dependant on temperature, humidity and thickness of coat. Temperatures below 10C should be avoided. If Aquathane Super is left to dry for a significant period, e.g. overnight, it will be necessary to abrade the surface using a suitable grade of sandscreen disc or paper (100 – 150 grit) in order to create a 'key' for further coats to adhere successfully. If any doubts arise, check the adhesion on a small area before extended use.

COVERAGE: 16 – 20m² per litre depending on surface porosity.

PACK SIZE: 5 litres. 4 x 5 litres per case
2.5 litres. 6 x 2.5 litres per case

STORAGE: Store in a cool dry place and protect from frost.
